

## Geography

### Statement of Intent, Implementation and Impact

At Braishfield Primary School, our **Purpose** is to **help every child grow** to be the best version of themselves that they can be. By educating each child emotionally, physically, spiritually and academically, we will prepare them for their future. In doing this, we will equip our children with the life skills to become confident, caring citizens who can play a positive and active role in modern society.

Our **Vision** for the school is a positive, nurturing and happy school community, based on **kindness, honesty and respect** for ourselves, each other and for our environment. We will all strive to be successful lifelong learners by developing **inquisitiveness, independence, collaboration and resilience**. We will all strive for excellence in everything that we do. We will all be brave, resilient learners, prepared to take learning risks and learn from our mistakes.

#### Intent

At Braishfield Primary School our intent is to deliver a high-quality Geography curriculum, which inspires children's curiosity and fascination about the world and its people. We intend to equip children with knowledge and skills that will remain with them for the rest of their lives. Geography, by nature, is an investigative subject. Teachers use creative, collaborative and discussion-based approaches to bring Geography alive and give children the opportunity to explore new learning themselves. In order to retain new skills, children frequently engage in practical activities in and beyond the classroom. Children investigate a range of places (both in the UK and the wider world) to develop their knowledge of the Earth's human and physical processes. We also intend for children to become confident using key geographical skills across a range of contexts. Children will have the opportunity to collect and analyse data, interpret sources of geographical information (maps, globes, digital mapping etc) and to communicate geographical knowledge in a variety of ways. Our aim is to ignite a passion for learning about the world they live in, both locally and worldwide and to understand the impact that humans have on the world. We seek to deepen the children's understanding by encouraging them to ask and answer questions about the world and provide them with the skills needed to become independent and competent geographers.

#### Implementation

To ensure high standards of teaching and learning in Geography, we implement a curriculum offer that is progressive throughout the whole school. Progression in skills and knowledge are clearly outlined in our Geography progression grid, which maintains strong links to the National curriculum. Teachers are encouraged to consider opportunities available to use the

school grounds and the local area for fieldwork. We are passionate about developing knowledge, understanding and skills as well as promoting out learning values of independence, collaboration, resilience and inquisitiveness, through children being outside and enjoying the Geography around them. Educational visits are also encouraged to enable children to gain real-life experiences and apply skills practically. Where appropriate, we make cross-curricular links so that learning is repeated in several contexts and children are given opportunities to recall knowledge and skills, strengthening their long-term memory. In order to plan for repetition and building of prior knowledge, teachers are expected to know what has been taught previously as well as having a secure understanding of what needs to be taught.

### Impact

Our Geography curriculum is planned to demonstrate clear progression. Children will develop the geographical knowledge and skills to enable them to explore, navigate and understand the world around them. Engaging lessons will shape inquisitive learners who aspire to research and explore new learning further. This will be evident through pupil voice, where children will confidently be able to talk about the skills and knowledge they have acquired and work will display the range of topics covered and clear cross-curricular links. Not only will children be equipped with the knowledge, skills and understanding set out in the Primary National Curriculum, they will be prepared to become competent geographers living in the wider world.
